Subject: ATLANTIC COAST PIPELINE WATER QUALITY PERMIT

I strong recommend against granting the permit for this pipeline. It is a threat to the environment and for what: gas we simply don't need. Methane pollution from fracked gas that will be enabled by this permit has an amplified impact on global warming. It's time to draw the line and put a stop to Duke Energy's arrogant, public-be-damned drive to shortcut proper permit reviews to further grow the fossil fuel footprint they are structurally handcuffing the state to for years to come.
